## JD 1- Limited Warranty

Your JD 1 hardware is covered by a limited warranty when you register your Canopus product. This warranty is for a period of three years from the date of purchase from Canopus or an authorized Canopus agent. This warranty applies only to the original purchaser of the Canopus product and is not transferable. Canopus Corporation warrants that for this period the product will be in good working order. Should our product fail to be in good working order, Canopus will, at its option, repair or replace it at no additional charge, provided that the product has not been subjected to misuse, abuse or non-Canopus authorized alterations, modifications and/or repair. Proof of purchase is required to validate your warranty.

Canopus Corporation has gone to considerable effort to make the users manual as accurate as possible at the time of printing. Canopus cannot assume, however, any responsibility for any inaccuracies that may be contained in the manual. In no event will Canopus Corporation be liable

for direct, indirect, special, incidental, or consequential damages resulting from any defect or omission in the manual, even if advised of the possibility of such damages.

As part of their ongoing process of continued product development, Canopus Corporation reserves the right to make improvements in the manual and the products it describes at any time, without notice or obligation.

CANOPUS CORPORATION IS NOT RESPONSIBLE FOR ANY LOST PROFITS, LOST SAVINGS OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT. THIS INCLUDES DAMAGE TO PROPERTY AND, TO THE EXTENT PERMITTED BY LAW, DAMAGES FOR PERSONAL INJURY. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

---

## FCC Notice

This equipment has been tested and found to comply with the limits for the class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed, and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

This equipment has been certified to comply with the limits for a class B computing device, pursuant to FCC Rules. In order to maintain compliance with FCC regulations, shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

---

## **Declaration of Conformity**

According to FCC Part 15

Responsible Party Name: Canopus Corporation

Address: 711 Charcot Avenue  
San Jose, CA 95131-2208

Telephone: (408) 954-4500

Declares that product: Model: Class B digital apparatus

Complies with FCC Standards and Canadian ICES-003.

---

## FCC-B Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits of a Class-B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

### Notice 1

The changes or modifications not expressly approved by the party responsible for compliance could void the users authority to operate the equipment.

### Notice 2

Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.

---

**Canopus Corporation**

**Tested to Comply  
with FCC Standards**

**For Home or Office Use**

---

### About this manual

The information contained in this manual covers:

#### **Chapter 1**—Introduction

Provides information about contacting us and using this manual.

#### **Chapter 2**—Installation

Includes easy to follow instructions on how to install the JD 1 hardware and software.

**Chapter 3—Functions- Getting to know JD 1**

Walks through a preset configuration and shows you how to customize the buttons on JD 1.

**Chapter 4—Troubleshooting**

Provides answers to the most common questions.

---

## Manual conventions

The following conventions are used throughout this manual:

- **Bold** usually indicates software menu commands

**File>Open**

- *Italic* is used for emphasis and naming
- [square brackets] refer to software messages to you

“info check” notifies you to write down parameters or make note of manual suggestions.

“caution” means to take care in avoiding physical injury or damage to the computer or peripherals.

---

## Trademarks

JD 1 is a trademark of Canopus Corporation. i.LINK is a trademark of Sony Corporation. DirectDraw and IntelliMouse are trademarks of Microsoft. All other trademarks and registered trademarks belong to their respective owners.

# CHAPTER 2

## *Installation*

JD-1  
JogDisk

This product is ***not*** intended for and should ***not*** be used for medical purposes, or with any equipment which might be used for life support.

### Before Installation

Make sure to read the following sections before installing the Jog Disk (JD 1) hardware and software. Please check to make sure you have a compatible system and inspect your JD 1.

#### Package Contents

Make sure your package contains the following items:

- JD 1 Controller
- JD 1 Software CD
- JD 1 Manual
- 1 m USB cable
- Registration card (in the manual)

Installation

### JD 1 System Requirements

Make sure your computer system meets the following requirements:

- Microsoft®Windows®98SE, Windows®ME, Windows® 2000\* (Service Pack 1)
- USB port

**Installing USB drivers in your system for compatibility**

Win 98SE and Win ME will require you to install the necessary drivers for USB support from your Win 98SE or Win ME CD.

**Before installing JD 1 hardware**

Please have your Windows 98SE, Windows ME or Windows 2000 installation CD ready, as described in the next section.

Unpack your JD 1 and make sure the wheel turn clockwise and counter clockwise smoothly. Check by clicking on all the buttons and making sure they are not damaged by visually looking for missing buttons or listening for no clicking sounds before you start (you should hear a click for each button).

## Using Your *JD 1*

The Jog Disk (JD 1) is used in conjunction with your edit applications and it allows you to custom map certain buttons on the JD 1. This custom mapping will let you edit from the JD 1 and eliminate you having to move your hands back and forth from the mouse to the keyboard.

### Windows version

JD 1 supports Windows 98, Windows 98 Second Edition, Windows Millenium Edition, and Windows 2000.

Compatibility

The JD 1 is compatible with the following applications:

Canopus Edits

- DVRex-RT Professional RexEdit (Ver.2.92)\*
- DVRex-RT (DVRex-M1 + RT Engine) RexEdit (Ver.2.91)\*
- DVRex-M1 RexEdit (Ver.2.53)\*
- DVStorm StormEdit (Ver.1.02)\*
- DVRaptor RaptorEdit (Ver.2.00)\*
- EZDV EzEdit (Ver.1.10)\*
- \* or higher/later

Other Edit Applications

- Adobe Premiere 5.1c
- Adobe Premiere 5.1 LE
- Adobe Premiere 6.0

Canopus Videos

- RexVideo
- RexVideo
- RexVideo
- StormVideo
- RaptorVideo
- EzVideo

## Hardware Installation

This section contains instructions on how to install the JD 1 hardware. Please follow the instructions below while installing the JD 1 controller.

### STEP 1: Connect JD 1

1. Plug the USB connector from the JD 1 to your computer.

### STEP 2: Turn on your computer

1. Windows will detect the USB connection and ask you to install the drivers. Insert your Win 98SE, Win ME or Win 2K CD.
2. Follow the instructions on the Add New Hardware Wizard. It will search for USB Human Interface Device.
3. Click on recommended search. Click Next.
4. Check on the "specific" box to search for drivers on your Windows CD. It will search for HIDDEV.INF. Click Next.
5. Windows will now install the drivers and restart your computer.

The first time you start Windows after installing the USB connection from JD 1, the **Add New Hardware** dialog will appear. Insert the Win 2K software CD-ROM in your CD-ROM drive and point the Add New Hardware wizard to look in D:\Drivers (where D: is the letter of your CD-ROM drive). Follow the on-screen instructions to install the drivers.

After the drivers are installed, restart your system and follow the steps under Applications Installation later in this chapter to install the JD 1 applications.

---

## Before installing JD 1 software

Please make sure your system is working properly and free of viruses.

---

## Applications Installation

To install the JD 1 applications, insert the JD 1 CD-ROM into your CD-ROM drive, and run Setup.exe by double-clicking the icon. The setup application will appear. Follow the prompts to install its application.

# CHAPTER 3

## *Functions*

Jog Disk  
JD-1

### Getting to know JD 1

The JD 1 is a simple and very useful tool for editing. It will allow you to learn about editing faster without having to remember all the combinations of shortcuts. For others, the JD 1 will allow you to customize some shortcuts eliminating the hassle of moving back and forth from the mouse to the keyboard.

The jog disk is light and ideal for everyone. From schools teaching kids to make and edit digital video more fun, to the business room doing presentations, the JD 1 makes editing a little easier, quicker, and fun.

Should there be any problems please refer to the last chapter, Troubleshooting or contact us.

# Onboard Switches

## Default Controls

Some buttons on the JD 1 have default controls and are not mappable. These buttons are shown in the picture below.

The **LED** will indicate the current status. (When lit it signifies: Deck, Jog or Shuttle control).

**Capture** button will capture in the Batch Capture Window of editing applications.

**Mark In** and **Mark Out** will mark the In and Out points in the timeline as well as in the Batch Capture Window.

**Add Clip** will add that batch capture to your batch capture file window list. **Divide Clip** will cut your clip in the timeline.

The button in the middle of the wheel will switch from Jog to Shuttle mode. **Jog control** allows you to move the wheel forward or reverse, frame by frame for accurate editing.

**Shuttle control** will play your video/clip at 1/4 speed to 40x. Turn the **wheel** clockwise to playback forward motion or counter clockwise for reverse motion playback.

**Play/Pause** button will playback your video/clip from the timeline as well as on the deck control on the camera.

**Deck/File** button will allow you to have camera control or to control your Edit application using the JD 1. The LED will light up if you are in deck control.

**Rewind** button in deck mode will rewind your video, but it will also move your editing line back to the next closest marker. **Fast Forward** button will forward your video in deck mode and move your editing line forward to the next break in the timeline.

---

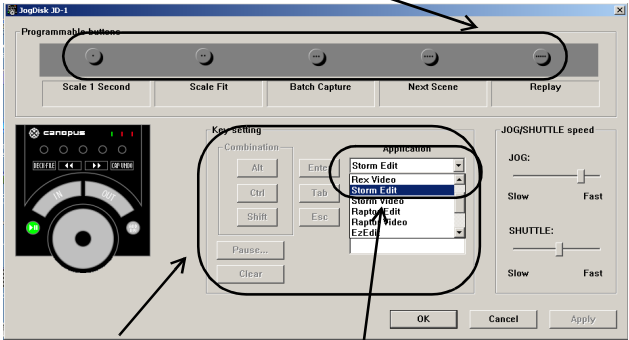

## Configuring your JD 1

With your computer turned on and your JD 1 connected via USB, have your Edit application running with the camera on VTR mode, double-click on the JD 1 icon in the task bar.

Your application should then look like the following.

Custom mappable buttons

Key Setting Dialog

Application Pull down Menu's

**Programmable buttons**

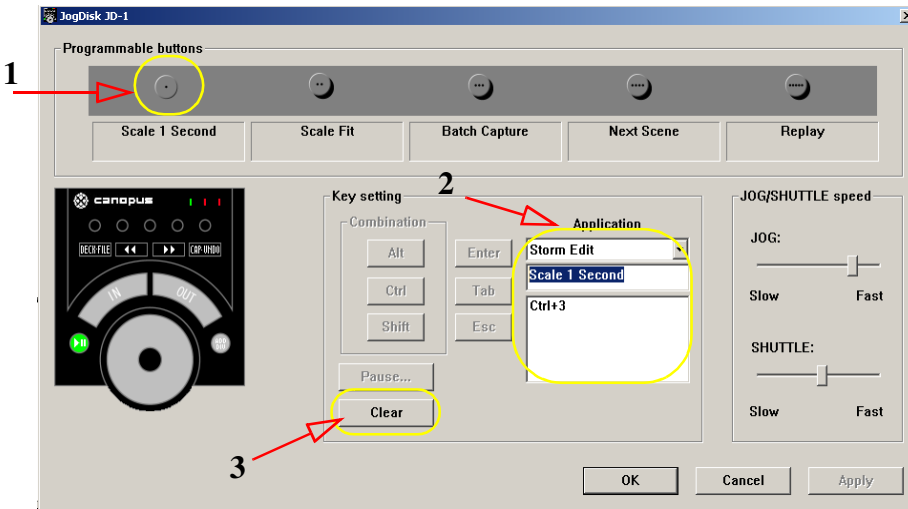

First click on the Application pull down menu and select the corresponding Edit application you are using. The buttons will have default presets. You can custom map these buttons by clicking on each button and setting the functions for that button in the Key Setting Dialog. You have five mappable buttons.

To reset these buttons back to the default settings, see the default preset list on page 3-8.

For combinations and details on their shortcuts see the chart on page 3-9.

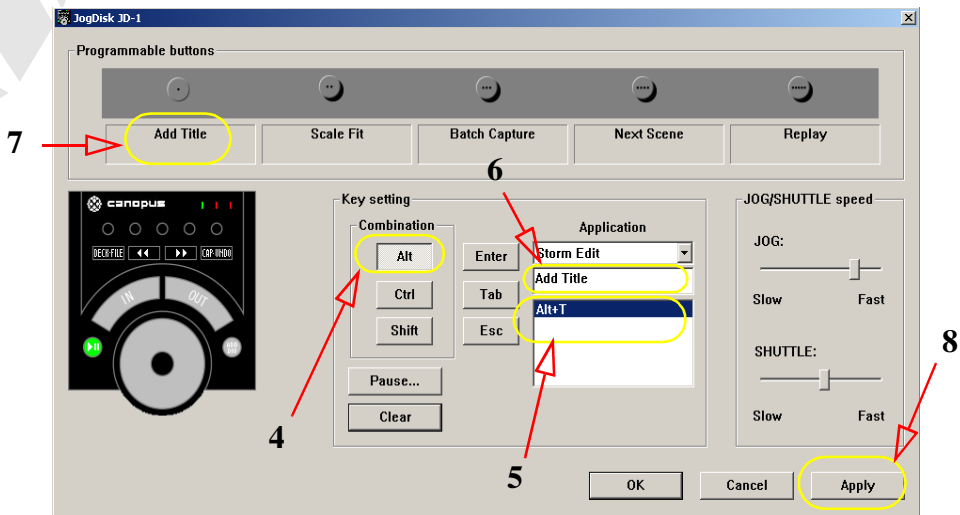

**For Example:** Under Application pull down Menu choose the Storm Edit application

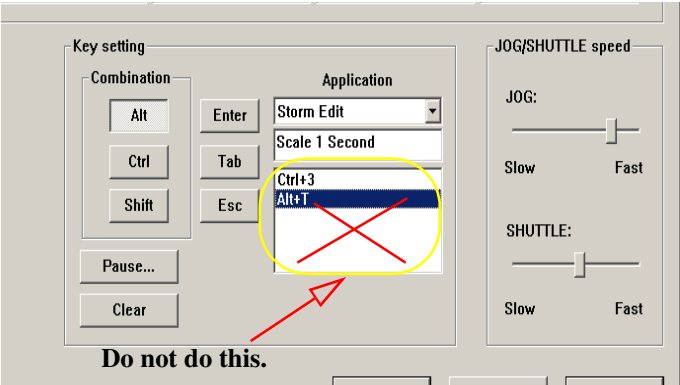

Click on the first button on the JD 1 application (1), you'll notice that it has a default setting in place (ctrl+3) with the function "scale to 1 second" (2). Click on clear (3). *You now can change its functions simply by changing the combinations in the dialog box. That button will now have that new function.*

Let's try to replace that function with the Alt + T, for the add title function. Click on the Alt button (4) then the letter "T" on your keyboard (5). Remember that the dialog will still show scale to 1 second, you will have to change this manually by entering the new functionality for the combination you reset. So type in Add Title (6) in the function dialog for reference. You can notice this change under button 1 (7). Click on Apply (8), this button now has the add title function.

Test this out by opening your Edit application (in this example, go to Storm Edit) and place some clips in the timeline and click on button 1 of your programmable buttons to see the result.

Make sure you do not add two or more different combinations for any one button. You can also customize the other buttons to do shortcuts instead of using the keyboard.

## Jog/Shuttle Slider

The jog/shuttle slider allows you to adjust the level of speed/acceleration on the JD 1 wheel. In jog mode, you can adjust the wheel to control the timeline frame by frame.

In shuttle mode, you can control the playback speed. You can play forward or reverse from 1/4 up to 40x.

Below are commands for Canopus Storm Edit and Rex Edit. Raptor Edit and Ez Edit do not have some of these functions. Please refer to their respective manuals for their functionalities.

For commands for Adobe Premiere, please refer to your quick reference card that came with your Adobe Premiere 5.1 or 6.0 package.

Default Presets

Programmable Buttons Default Presets						
Rex Edit Rex Edit M1 Storm Edit Raptor Edit EzEdit		Button 1	Button 2	Button 3	Button 4	Button 5

## Connecting your DV camera or deck

Connect your camera or deck to your capture card using the 4-pin to 4-pin i.LINK cable. Plug one end of the cable into your camera or deck's i.LINK jack, and plug the other end of the cable into capture card's i.LINK jack.

**If you are connecting a DV camera, make sure it is in VTR mode, and not Camera mode.**

You can control your camera via the JD 1. Click on the Deck button and you have control of the camera with the default buttons on JD 1.

---

## Troubleshooting

This chapter will cover some common problems with JD 1 and steps you can use to resolve them before you need to contact Canopus Technical Support.

---

### Pre-Installation issues

#### **What if I have Windows NT? Can I still use it?**

No. Windows NT does not support USB. You should upgrade your system to Windows 2000. Please call your dealer from whom you purchased it from.

#### **I don't have a DV or Digital 8 camera or deck. Can I use JD 1?**

Yes. JD 1 will allow you to control your Editing application and still allow you to custom map your buttons for short-cuts.

#### **Does it matter if I have NTSC (or PAL) version?**

No. Both the JD 1 application and controller will work on either version.

## Can I use the JD 1 with other application other than those listed in chapter 2?

No. This product is made specifically for video editing applications.

### Installation issues

#### I don't have my Windows 98, Windows ME or Windows 2000 CD. How do I obtain the USB drivers?

You can go to Microsoft's web site and do a search for USB drivers and download it from there. Go to [www.microsoft.com](http://www.microsoft.com)

#### My JD 1 install CD does not work. Who do I contact?

You can contact us at:  
Canopus Corporation  
711 Charcot Ave.  
San Jose, CA 95131  
U.S.A

(408)954-4500

[www.justedit.com](http://www.justedit.com)

### General usage issues

#### I installed the application and the JD 1 does not work. What do I do?

Check and make sure the connections are plugged in. If that did not solve the problem then try uninstall and reinstall of the JD 1 application and driver.

## **My JD 1 is damaged. What do I do?**

If your JD 1 is damaged by freight, contact your dealer or Canopus. We do not replace any damage made by user mishandling. Refer to the warranty on the front of this manual for more information.

JD-1  
Joquisk

---

## **Other questions**

### **I damaged/lost my USB cable, how or where can I obtain another?**

The JD 1 uses an USB cable, you can purchased this at any major computer store.

### **Where can I get more information?**

Go to the JD 1 section of the Canopus website at <http://www.canopuscorp.com/goto/jd1.htm>

While you're there, you can also visit our User groups where you can get help and advice from customers using Canopus products around the world.
